" During my experience in Malta with Travoyage Malta I learned a lots of things. The work experience I have done at the beginning was working with the installation of the gps trackers. Then I worked with the IT department where I translated a JavaScript file. One day I have done also the inventory of the warehouse. Then I worked on full stack web developing with Laravel furthermore I used a bit Figma for the front-end part and completed it with html, css and JavaScript, I have also done and edited the photo for the website.

Beyond the internship we also had many wonderful adventures around malta.

Overall it was an amazing experience also thanks a Travoyage Malta that allow us to do that. I think I've grown up and all things that I've done here will be useful for my future but also in the present. I will carry this experience with me forever in my heart."
